studies peace and conflict resolution military studies diplomacy and sociology and in related disciplines

this monograph compares two trade agreements among three important economic regions namely the korea eu free trade agree fta and the japan eu economic partnership agreement epa the two new types of agreements came into effect in the 2010s they not only create more favorable trade and economic conditions in these regions but also produce spillover effects to bring about more comprehensive conditions in other area first the quantitative research for both agreements using the cge model and a tentative analysis of the japan eu epa in the analysis show that both have already created positive impacts on all three economies by lifting or reducing tariff and non tariff barriers such positive impacts are also expected to be felt by smes in these countries that are involved additionally the high level of tariff and non tariff liberalization in the two current agreements will make positive impacts on the negotiation of other ftas and on wto reform the advantages of the fta and epa dealt with in this book are not restricted to these economic effects as the agreements are comprehensive they will create more favorable social conditions not only in these economic regions but in other areas of asia as well

in light of many crises in the last two decades including democratic recession climate change economic crises and massive waves of migration affecting perceptions of security around the world this book examines the impact of cultural change in political communities on the global political and security environment through various case studies of political communities around the world the book analyzes contemporary responses to cultural change often culminating in the rise of political populism and extremism the book is divided into two parts and presents a foreword by larry diamond and an afterword by eric shirayev the first part focuses on the micro level of cultural change in political communities and discusses conflict mechanisms and the role of political participation in producing changes the second part features studies on extremism and populism analyzing their impact on cultural change in europe the book is intended for scholars and students in a variety of disciplines including international relations security studies cultural studies and related fields

quantum physics shows us that we create what we observe countless experiments confirm that it is our information which manifests reality matter and time are created by our observation this is not only true when we do experiments in laboratories but it works the same way in

everyday reality we manifest our own experiences science does not prove that our consciousness must be a product of our material brain on the contrary consciousness emerging from the brain is just a belief this book tells the story how physics did develop from a quest to understand nature into its current highly myopic materialistic paradigm the profound spiritual message of quantum physics is ignored to our detriment a wonderful very readable book that will convince thousands upon thousands of serious readers including students of science why consciousness is necessary to understand quantum physics and why materialist science is not adequate i give the book my highest recommendation amit goswami phd author of the self aware universe a monumental book a masterpiece in disguise prof emer dr dirk k f meijer university of groningen
